#### PUBLIC NOTICE OF AVAILABILITY

#### THE NATIONAL PARK SERVICE ANNOUNCES THE AVAILABILITY OF THE ADMINISTRATIVE RECORD FILE FOR

## THE NEWHALEM PENSTOCK SITE ROSS LAKE NATIONAL RECREATION AREA

The National Park Service (NPS) announces the availability for public review of documents comprising the Administrative Record File for the selection of a time-critical response action at the Newhalem Penstock Site in Newhalem, Washington, located within Ross Lake National Recreation Area. The NPS seeks to inform the public of the availability of the Administrative Record File at the information repositories listed below, and to encourage the public to review documents in the Administrative Record File. Although public comments are welcome at any time, a formal public comment period will begin on March 8, 2017 and will extend for 30 days following. During this time, public comments can be made electronically at http://parkplanning.nps.gov/CERCLANewhalemPenstock or submitted via mail to the contact listed below.

The Administrative Record File includes documents that were considered and/or relied upon in the selection of the time critical response action at this Site. Documents in the Administrative Record File include the Soil Sampling/XRF Survey Report, the Action Memorandum for the Time Critical Removal Action at the Newhalem Penstock, information regarding measures taken to prevent erosion and off-site contamination during heavy rains, and a letter clarifying the schedule of implementation of the action.

As removal actions proceed and as public comments are received during the comment period, additional documents will be added to the Administrative Record File. These additional documents will include, but will not be limited to, press releases, comments submitted by interested persons, NPS responses to significant comments, and the Community Relations Plan.

The Administrative Record File is available for review in the following locations:
